

Clear Doorsill Guard

XPEL Clear Doorsill Guard is made from XPEL Paint Protection Film. It is a rugged, clear, polyurethane plastic employing a clear-coat finish for maximum shine and durability. Once applied, this material is virtually invisible yet helps prevent chipping, scratching and scuffing to the protected surface

Directions:

1. Mix 1 quart of water with 3 or 4 drops of dishwashing liquid in a spray bottle or large bowl.
2. Cut an appropriate size piece of film from the roll using a pair of scissors.
3. Peel the backing paper from the film and wet with soap and water solution.
4. Slide into place on the door sill with the adhesive side down. More soapy water may be added if necessary to move the part easily.
5. Squeegee the water from beneath the film using the supplied squeegee.

XPEL Doorsill Guards are designed to withstand years of wear and tear. However, being semi-permanent, it can easily be removed if needed. Please visit www.xpel.com for complete removal instructions.
