

Door Edge Guard

XPEL Door Edge Guard is made from a rugged clear, polyurethane plastic employing a clear-coat finish for maximum shine. Once applied, this durable material is virtually invisible yet helps prevent chipping, scratching and scuffing to the protected surface.

Directions:

1. Cut an appropriate size piece of film from the roll using a pair of scissors
2. Peel 2- 3 inches of the backing paper from the end of the roll and align the film with door edge.
3. Allow the adhesive to touch the paint and smooth with your thumb. If the part is not straight, pull the film back up and realign.
4. Repeat steps 2 and 3 for the rest of the strip.
